Real-Time: HTML5 & node.js

setup

<http://python.org/download/>

you "need" python

<http://nodejs.org/download/>

you need node.js

<https://github.com/getify/unnamed.git>

Unnamed is a game!

```
Blackbeard:unnamed getify$ git checkout step1
```

```
Note: checking out 'step1'.
```

You are in 'detached HEAD' state. You can look around, make experimental changes and commit them, and you can discard any commits you make in this state without impacting any branches by performing another checkout.

If you want to create a new branch to retain commits you create, you may do so (now or later) by using `-b` with the checkout command again. Example:

```
git checkout -b new_branch_name
```

```
HEAD is now at 4ccf634... rename
```

```
Blackbeard:unnamed getify$ ls -la
```

```
total 8
```

drwxr-xr-x	6	getify	staff	204	Jul	23	12:38	web

```
Blackbeard:unnamed getify$ █
```

```
Blackbeard:web getify$ python -m SimpleHTTPServer 8080  
Serving HTTP on 0.0.0.0 port 8080 ...  
█
```

or: `python3 -m http.server 8080`

```
Blackbeard:server getify$ cat secret.js
exports.PUBLIC_SERVER_ADDR = "..";
exports.PUBLIC_SERVER_PORT = 0;

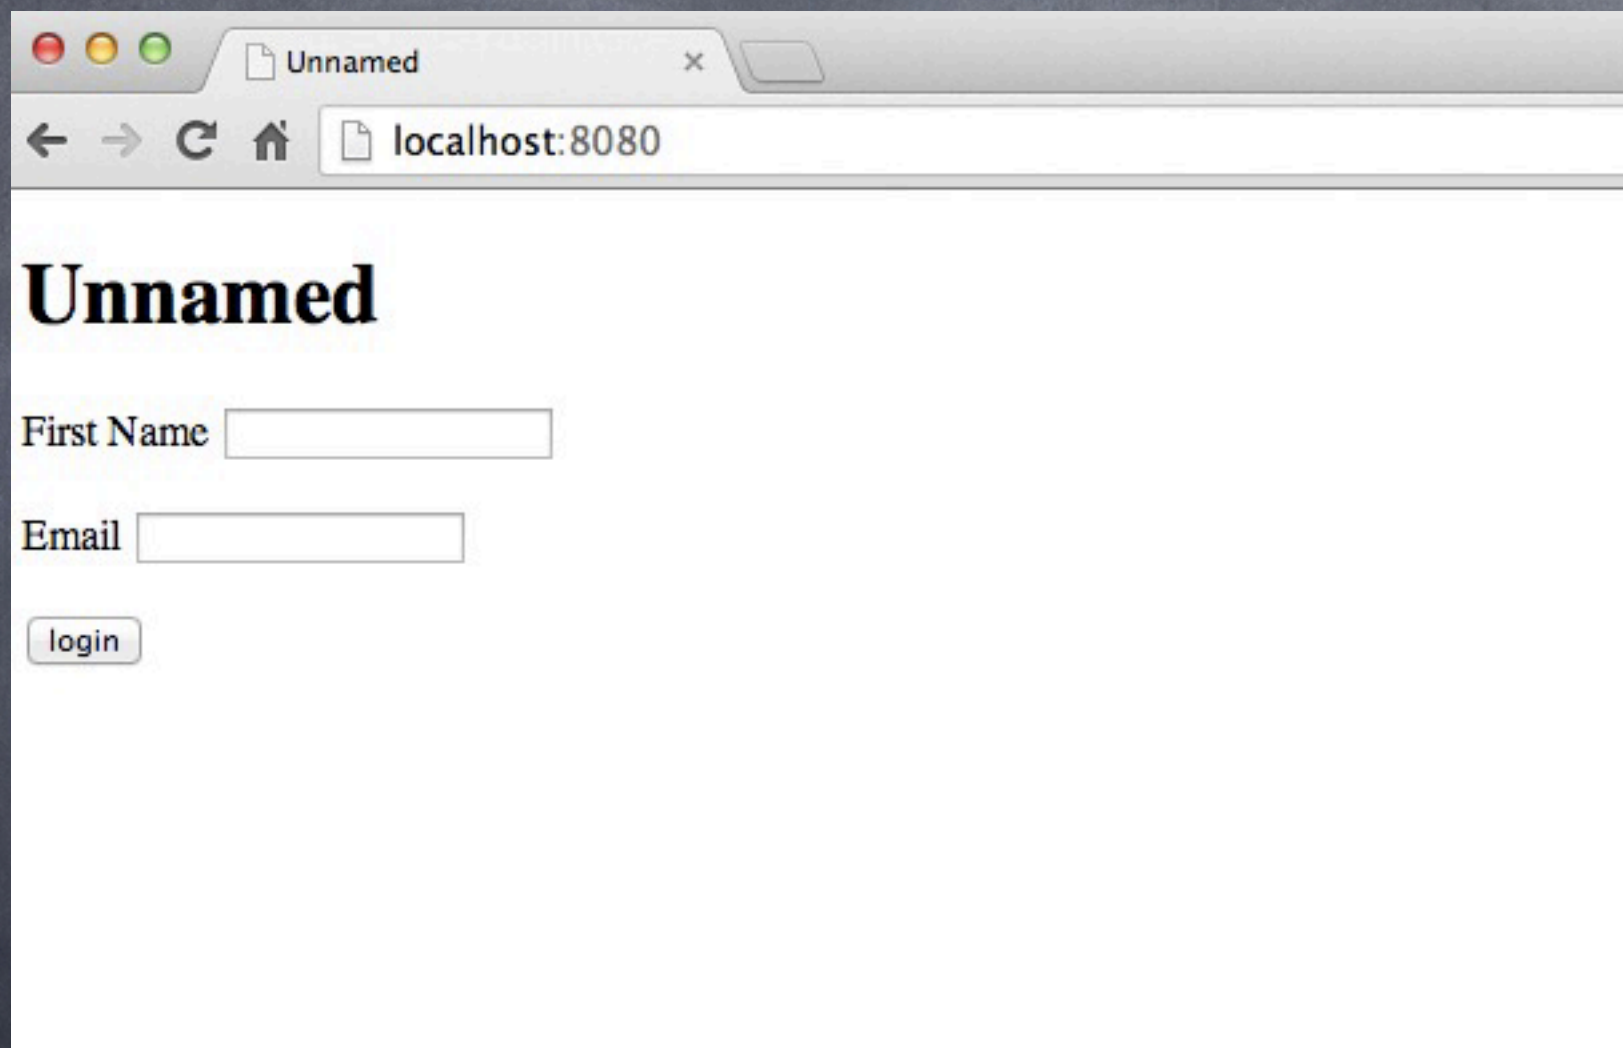

exports.INTERNAL_SERVER_ADDR = "127.0.0.1";
exports.INTERNAL_SERVER_PORT = 8005;

exports.CORS_GET_HEADERS = {
  "Access-Control-Allow-Origin": "http://localhost:8080",
  "Access-Control-Allow-Credentials": false,
  "Access-Control-Allow-Methods": "GET, OPTIONS",
  "Access-Control-Allow-Headers": "Content-Type, User-Agent, X-Requested-With"
};
exports.CORS_POST_HEADERS = {
  "Access-Control-Allow-Origin": "http://localhost:8080",
  "Access-Control-Allow-Credentials": false,
  "Access-Control-Allow-Methods": "POST, OPTIONS",
  "Access-Control-Allow-Headers": "Content-Type, User-Agent, X-Requested-With"
};
Blackbeard:server getify$ █
```

```
Blackbeard:server getify$ node server.js
```

A screenshot of a web browser window. The browser's address bar shows 'localhost:8080'. The page title is 'Unnamed'. The main content area displays the word 'Unnamed' in a large, bold, serif font. Below this, there is a form with two input fields: 'First Name' and 'Email'. The 'First Name' field is followed by a small square button. The 'Email' field is followed by a small square button. Below these fields is a rounded rectangular button labeled 'login'.

Unnamed

First Name

Email

login
